

What is claimed is:

1. A wrapper for wrapping a floral grouping, comprising:
 - a tubular sleeve having an upper end and a lower end and having an inner surface surrounding an interior space and an outer surface, and having a reservoir attached to the inner surface;
 - an adhesive or cohesive bonding material disposed upon a portion of at least one of the inner surface and the outer surface for holding overlapping portions of the tubular sleeve in a crimped position adjacent a portion of the floral grouping when the floral grouping is disposed within the interior space of the tubular sleeve; and
 - wherein the tubular sleeve further comprises a closure flap extending from the upper end for enclosing the upper end of the tubular sleeve.
2. The wrapper of claim 1 further comprising a cinching tab attached to the tubular sleeve.
3. The wrapper of claim 1 comprising the bonding material disposed upon a portion of the outer surface of the tubular sleeve.

4. The wrapper of claim 1 comprising the bonding material disposed upon a portion of the inner surface of the tubular sleeve.

5. The wrapper of claim 1 comprising the bonding material disposed upon portions of both the inner surfaces and the outer surfaces of the tubular sleeve.

6. The wrapper of claim 1 further comprising a label bonding material disposed upon a surface of the tubular sleeve for affixing a label to a portion of the tubular sleeve.

7. The wrapper of claim 1 wherein the lower end of the tubular sleeve is closed.

8. The wrapper of claim 1 wherein the lower end of the tubular sleeve is open.

9. The wrapper of claim 1 wherein the adhesive or cohesive bonding material has a release material disposed thereon.

10. The wrapper of claim 1 wherein the reservoir of the tubular sleeve contains water, preservatives, nutrients, gels, foams, or decorative materials.

11. A wrapper for wrapping a floral grouping, comprising:
 - a tubular sleeve having an upper end and a lower end and having an inner surface surrounding an interior space and an outer surface, and having a reservoir attached to the inner surface;
 - an adhesive or cohesive bonding material for crimping together overlapping portions of the tubular sleeve in a crimped position adjacent a portion of the floral grouping when the floral grouping is disposed within the interior space of the tubular sleeve;
 - a cinching tab extending from the tubular sleeve to the adhesive or cohesive bonding material for attaching overlapping portions of the tubular sleeve when the tubular sleeve is wrapped about the floral grouping for holding the overlapping portion in the crimped portion; and
 - wherein the tubular sleeve further comprises a closure flap extending from the upper end of the tubular sleeve for enclosing the upper end of the tubular sleeve.
12. The wrapper of claim 11 wherein the adhesive or cohesive bonding material is disposed upon a portion of the cinching tab.

13. The wrapper of claim 11 wherein the adhesive or cohesive bonding material is disposed upon a portion of the outer surface of the tubular sleeve.

14. The wrapper of claim 11 further comprising the adhesive or cohesive bonding material disposed upon portions of both the cinching tab and the outer surface of the tubular sleeve.

15. The wrapper of claim 11 further comprising a label bonding material disposed upon a surface of the tubular sleeve for affixing a label to a portion of the tubular sleeve.

16. The wrapper of claim 11 wherein the lower end of the tubular sleeve is closed.

17. The wrapper of claim 11 wherein the lower end of the tubular sleeve is open.

18. The wrapper of claim 11 wherein the adhesive or cohesive bonding material has a release material disposed thereon.

19. The wrapper of claim 11 wherein the reservoir of the tubular sleeve contains water, preservatives, nutrients, gels, foams, or decorative materials.

20. A wrapper for wrapping a floral grouping, comprising:
a tubular sleeve having an upper end and a lower end and having an inner surface surrounding an interior space and, an outer surface, and having a reservoir attached to the inner surface;
a cinching tab extending from the tubular sleeve and having an adhesive or cohesive bonding material disposed thereon for crimping together overlapping portions of the tubular sleeve in a crimped position adjacent a portion of the floral grouping when the floral grouping is disposed within the interior space of the tubular sleeve; and
wherein the tubular sleeve further comprises a closure flap extending from the upper end of the tubular sleeve for enclosing the upper end of the tubular sleeve.

21. The wrapper of claim 20 further comprising a label bonding material disposed upon a surface of the tubular sleeve for affixing a label to a portion of the tubular sleeve.

22. The wrapper of claim 20 wherein the lower end of the tubular sleeve is closed.

23. The wrapper of claim 20 wherein the lower end of the tubular sleeve is open.

24. The wrapper of claim 20 wherein the adhesive or cohesive bonding material has a release material disposed thereon.

25. The wrapper of claim 20 wherein the reservoir of the tubular sleeve contains water, preservatives, nutrients, gels, foams, or decorative materials.
